

Nicaragua

MANDATE

Since 1997, HI has developed and strengthened the technical skills of partner organisations working in the field of disability in Nicaragua. After working in the country for 15 years, HI decided that the conditions were right to transfer the overall management of the project to its local NGO partner, *Vision Inclusiva*, and to phase out its actions in Nicaragua. *Vision Inclusiva* has been working in the field of disability since 2011. HI continues to support the organisation's projects and to strengthen its autonomy.

SITUATION

Nicaragua is one of the poorest countries in Latin America and the Caribbean (125/188_HDI¹). This poverty has caused serious health problems - cancer, cardiovascular problems, diabetes and high blood pressure - which are the leading causes of morbidity² and mortality³ among adults in the country. An estimated 9% of people have diabetes and 25% have high blood pressure. Approximately 52% of people with diabetes also have high blood pressure⁴. For 2017 the ninth / fourteenth line of action of the Ministry of Health are chronic diseases.

INITIAL ACTIONS

Since 2004, HI and NGO *Vision Inclusiva* (VI) have worked together, in partnership with decentralized structures of the Ministry of Health, clubs for people with diabetes and hypertension, and the "Fe y Esperanza" association of diabetics and hypertensive people (ADHFE)⁵ in the departments of Estelí and Masaya, where the incidence of disability is particularly high, and where chronic diseases such as diabetes, cardiovascular disease, high blood pressure and arthritis are extremely high. –In 2016 VI has started a new project to prevent diabetes in partnership with two universities in the department of León.

KEY DATA

Human development index (HDI) *	125/188 classified countries
Gross National Income per capita (\$PPA)*	4,457 \$ per annum
Surface area**	130,373 sq.km.
Population**	6.17 million inhabitants
Life expectancy*	74.9

** UNSD 2015

Convention on the rights of people with disabilities (DRPD)	Ratified 7 December 2017
Oslo Convention on Cluster Munitions	Signed: 2 November 2009
Ottawa Mine Ban Convention	Ratified: 30 November 1998

*UNDP: 2015 human development report

HI TEAM

Projects are implemented by a team of four people from *Vision Inclusiva*, with support from HI.

¹ UNDP 2015

² Morbidity is the ratio of the number of people who contract a disease to the state of health of a given population. It combines the incidence and prevalence of a disease.

³ Diabetes is the third leading cause of death in Nicaragua.

⁴ Study performed in Estelí with funding from Sanofi, dating from 2007.

⁵ HI implements these actions in two departments composed of 15 cantons in total: the Department of Estelí since 2004 (Estelí, La Trinidad, San Nicolás, Condega, Pueblo Nuevo and San Juan de Limay) and the department of Masaya (Masaya, Catarina, San Juan de Oriente, La Concepción, Masatepe, Nandasmo, Nindirí, Niquinohomo and Tisma).

Control of diabetes: Spreading Hope through Strengthened Relations
