b. Humanitarian law instruments ratified by the country

Humanitarian law instruments	Status
Ban Treaty Mine	Non-ratified
Convention on Cluster Munitions	Ratified on 06/04/2016
UN Convention on the Rights of Persons with Disabilities	Ratified on 06/09/2007

c. Geopolitical analysis

The Republic of Cuba, the biggest country in the Caribbean, developed as a socialist country after the end of the revolution in 1959. After the fall of the Soviet Union in the early 90s, the country, whose economy was strongly tied to the USSR, entered a long period of economic challenges (*periodo especial*), that ended also through a progressive diversification of the national economy.

However, while many countries (including the whole EU) have recently revised their position against Cuba and fostered economic, cultural and political exchanges, the embargo imposed on the country by the USA is still heavily affecting not only the growth capacity of the island, but life of all the Cubans.

Cuba is currently experiencing the most severe economic crisis since the "special period" following the collapse of the USSR in the early 1990s. The Cuban economy has been hit hard by the tightening of the US embargo and sanctions since 2018, as well as by the difficulties of its main ally in the region, Venezuela, while its growth had already slowed down since 2013. Despite a limited human toll, the COVID-19 crisis has only worsened an already precarious situation by depriving the country of one of its main resources, tourism. Cuban GDP fell by 11% in 2020.

Since 1 January 2021 and monetary unification, the country has experienced galloping inflation, increased difficulties for the population to obtain basic necessities and, as a result, timid demonstrations by civil society - a growing dissatisfaction among the population.

The new wave of infections from June 2021 onwards and the collapse of the health system in several provinces helped to drive thousands of Cubans into the streets on July 11th 2021 in a historic demonstration. Since then, the government has announced several measures to ease the daily life of Cubans (such as the possibility for individuals to import food and medicine in luggage without weight limits) and is trying to rebuild a certain social consensus.

Summary of HI presence in the country

Present in Cuba since 1998 and always working in strong partnership with the 3 local disabled people organisations (ANCI, ACLIFIM and ANSOC), HI has initially supported prosthesis and orthosis production and community based rehabilitation (CBR). In time, attention has shifted to support to civil society and inclusive education, sided by emergency response to hurricanes. Today, the trust and recognition gained throughout the years, together with the lively interaction with the disabled people organisations (DPO), has brought HI to focus on socioeconomic inclusion of persons with disability and CBR. Meanwhile, the program is embodying the nexus through its action in IDRR (Inclusive Disaster Risk Reduction), implemented in Cuba and, more recently, through support to partners in Dominican Republic. In this framework the program has responded to the emergency created by the F4 tornado which hit La Havana in January 2019.

Overview on ongoing projects

Sectors of services where HI conducts projects and focus on beneficiaries and operational partnerships

Main sectors of intervention & title of project	Objective of project in the sector	Main activities	Beneficiaries	Final Beneficiaries	Partners	Location	Dates of beginning and end of the project and Donors
