c. Geopolitical analysis

Burkina Faso is one of the poorest countries in the world. People living in the most precarious conditions are often illiterate with little or no access to healthcare and low spending power. The most vulnerable people, including people with disabilities, receive almost no medical assistance and are rarely included in the economic and social life of the country. It is difficult for them to fully enjoy their basic rights to education, vocational training and employment. Most suffer exclusion and extreme poverty. Since 2015, conflicts between the state and non-state armed groups in the northern regions of Burkina-Faso have increased insecurity. This permanent conflict situation has forced 1 million people from their homes in Burkina-Faso, depriving them of economic resources essential to their survival.

Summary of HI's work in the country

Burkina Faso was the first West African country in which HI worked. The organisation has been registered there since 1991, when it helped rehabilitate the National Orthopaedic Fitting Centre of Burkina Faso (CNAOB) in partnership with the Ministry of Health. It subsequently supported the development and setting up of other rehabilitation and fitting centres across the country. Over the following years, HI went on to diversify its work in Burkina Faso.

Until 2015, HI almost exclusively carried out development projects. Since then, the association has progressively reoriented its operations to respond to the chronic and humanitarian needs of populations. In 2021, out of 12 projects, 50% are humanitarian projects, 25% of the projects respond to chronic crises and 25% respond to development needs.

HI facilitates the establishment of a regional functional rehabilitation network and the integration of this network into the national health system. HI trains health and functional rehabilitation professionals. Through its inclusive education project, the association facilitates access and retention of disabled children in primary and post-primary schools and vocational training, ensuring quality education. To ensure the sustainability of this project, the organization trains and sensitizes people working in the disability and inclusive education sectors. Finally, after several years of contribution to research, HI is conducting a project on the issue of road safety in Ouagadougou.

As part of its crisis response, HI addresses the needs of households in the Sahel region facing insecurity, including food insecurity through RECOSA, the Project for Strengthening the Resilience and Social Cohesion of Vulnerable People in the Cross-Border Regions of Burkina Faso (Sahel region) and Niger (Tillabery region), and the physical and emotional stimulation of malnourished children in the Sahel. HI also helps schools to address the impact of insecurity in the Sahel and Eastern regions by implementing school preparedness and response plans.

Lastly, HI's response to humanitarian needs aims to support vulnerable people (including students and teachers) who have suffered shock or trauma as a result of the crisis, and to meet the basic need for shelter of people in Soum province (the province second worst-affected by

population displacement). HI is also a member of the consortium leading the Rapid Response Mechanism (RRM) project in Burkina Faso to alert and provide information on the needs of displaced people. Lastly, HI implements a project to help humanitarian response actors make their projects more inclusive of older people and people with disabilities.

Current projects

Sectors where HI implements projects, focusing on beneficiaries and partners

Main sectors where we work	Project goals in the sector	Main activities	Beneficiaries	Beneficiaries at the end of the project	Partners	Location	Project start and end date and funding bodies
Inclusion	Holistic support to ensure people with disabilities access health and rehabilitation services, education and employment.	Competence building Systems consolidation Community mobilisation	200 adults with disabilities, including 100 women Young people with disabilities aged 6-17: 300, including 150 girls and young women Children with disabilities under 5: 3,346, including 1,740 girls Community officers: 100 Local and traditional authorities: 180 General population: 223,500		Directorate-General of Public Health (DGSP). Regional Department for Social Action and National Solidarity. Tenkodogo Regional Hospital Centre (CHR). National Centre for Orthopaedic Fitting of Burkina Faso (CNAOB) 6 private rehabilitation centres in Garango, Koupéla, Tenkodogo,	Centre-East region Centre region	01.2018 to 12.2022 MOFA Lux

					Zabré and Ouargaye, in the Centre-East health region (city of Tenkodogo).		
Inclusive Education	Inclusive Education & Vocational Training for Young People with Disabilities in Burkina Faso.	Identification, consultation, referral/registration, training of teachers and educational supervisors, follow-up of teachers and students. Institutional support to take into account inclusive education in education policy documents.	10,757 students with disabilities enrolled in school, of whom 5,993 boys and 4,764 girls.		Local education actors (decentralised regional departments) and the Ministry of National Education and Literacy.	National project with field activities in the Sahel, Eastern and Central regions	09.2017 To 12.2021 AFD NORAD UNICEF
Inclusive Humanitarian Action	The project aims to improve care for vulnerable people, including people with disabilities, by promoting their inclusion in and access to humanitarian response programmes	Rapid emergency-impact assessment for crisis-affected people with disabilities Local capacity-building for state and non-state actors Raising community awareness of inclusion and disability Identifying people with disabilities and distributing technical mobility aids (and assisting people) Support for referrals to specialised services or other humanitarian actors/projects based on identified needs	1,500 people with functional limitations 58 inclusion focal points ; 34,798 people sensitized; 386 actors sensitized and trained; 17 humanitarian actors accompanied to make their intervention inclusive.			Sahel regions, Centre-North region North region	06.2020 to 05.2023 DGD MOFA Lux

		Raising awareness of humanitarian actors	5 DPOs (Young Women and Elderly) have been strengthened 5 clusters have received technical support				
Disaster Preparedness/Risk Reduction	Build the capacity of schools in the Sahel region and combat stress among education actors (Project Safe School)	Implementing emergency preparedness and response plans. Training on the protective learning environment approach	46,354 students in 202 schools ; 8575 teachers and supervisors (in intervention schools) 1219 community workers (487 women and 732 men)		Local education actors (decentralised regional departments) and the Ministry of National Education and Literacy, SAMENTI, a civil society organisation, and UNICEF.	Sahel region East region	01.2018 12.2021 UNICEF
Rehabilitation	Prevent and limit the complications and disabling sequelae of malnutrition in children under 5 suffering from severe acute	Training in stimulation physiotherapy and the management of severe malnutrition Organising group development and play sessions Anthropological study on the parent/child/caregiver	4,938 children under 5 with severe acute malnutrition Of whom 396 children at high risk of disabling sequelae			Sahel region	05.2019 to 12.2021 DGD

	malnutrition in Burkina Faso	relationship in nutritional services Mobilising and capacity-building for community referral actors Organising at-home visits to follow-up severely malnourished children at high risk of disabling sequelae Raising the awareness of nutrition actors and providing input into existing clusters or forums in order to include development stimulation in plans to combat malnutrition	9,876 parents or guardians of malnourished children 30 health and social services personnel 125 local actors, officers and community leaders				
Mental health, Psychosocial Protection	Provide internally displaced people and conflict-affected people with better access to psychosocial care and protection services in order to assist and support their resilience in the Sahel, North and Centre-North regions	Implementing mental health awareness sessions Implementing individual and/or family psychological and psychosocial care sessions Setting up a listening and play area for children and parents Referral based on mapping of existing assistance and protection services and actors trained in stress management and psychological first aid	5400 people sensitized in Mental Health ; 900 people taken in charge; 5100 people assisted in the listening centers; 216 people referred; - 240 people trained		Implementation partner: DRC	Sahel region North region Centre-North region	05.2020 to 04.2022 ECHO DGD

		Training of actors in mental health, stress management and the integrated, inclusive approach					
Road safety	Capacity-building for actors responsible for the case-management of injured people and technical platforms in Burkina Faso.	Rapid assessment of traffic accidents First aid training Revising training modules for WHO emergency services Training of emergency services staff Training of social service professionals in the management of post-traumatic stress disorder	80 CLSU members 40 emergency staff trained 30 social service professionals trained in the case-management of post-traumatic stress disorder		Expertise France, IRD, Ici Santé,	Centre Region (city of Ouagadougou)	11.2018 To 12.2021 UE Expertise France
