Mine Ban Treaty	Signed on 05/12/1997 Ratified on 23/01/2011
Convention on Cluster Munitions	Signed on 03/12/2008
UN Convention on the Rights of Persons with Disabilities	Signed on 30/03/2007 Ratified on 19/05/2008

c. Geopolitical analysis

Social/cultural/demographic elements

In 2017 and 2019, the conditions in arid regions of Kenya deteriorated significantly due to drought. There has also been a negative impact of floods and landslides on household food and income sources in various parts of the country. The region was also ravaged by the invasion of desert locusts, which affected crops and vegetation. This led to heightened food insecurity, decreased health and nutrition status at a time when political instability has also increased. Within this context, the welfare of people with disabilities and vulnerable people is at a greater risk of neglect and reduced provision of services such as education and health.

In July 2021 the National Drought Management Authority issued a bulletin stating that twelve counties and a long rains assessment report released in August indicates worsening food security and nutritional situation in 12 counties, with 23 counties recording drought. On

September 8, 2021, the President of the Republic of Kenya declared the drought a national disaster.

Political context

From the 2020 Human Development report by UNDP, Kenya is ranked 143 out of the 189 countries on the Human Development Index. Increased circumstances of gender inequality have had a negative impact on inclusive human development and economic growth of population especially in areas such as the labour markets, access to education and appropriate healthcare. Correspondingly, as a recognized vulnerable group, the rights of people with disabilities are often times neglected, contributing to increased poverty and sub-standard living conditions.

Summary of HI presence in the country

In 1992 HI launched its activities in Kenya through an emergency food aid program in Garissa, following the famine and civil war in Somalia.

For the next four years, HI focused on improving surgical treatment at Garissa Provincial Hospital for refugees and support to the primary health care system in neighbouring communities.

Since 2006, Humanity & Inclusion has taken a leading role in the development of HIV&AIDS awareness, prevention and treatment for persons with disabilities in the Country. It began bolstering its support for the physical rehabilitation and education of children with disabilities in Kibera and Dandora informal settlement areas and persons with disabilities in the Dadaab refugee camps in 2007.

In 2009 HI also implemented an inclusive education project in Nairobi outskirts aimed at ensuring that marginalized children to have equal access to education opportunities.

In August 2013, the organization launched a regional project in Kenya and Tanzania, which contributes to implement the International Convention of People with Disabilities. An on-going Mother and Child Health Care Project was launched in informal settlements in 2014 which seeks to improve the health status of mothers, new-borns, and children in marginalized populations within Nairobi. In the same year an Armed Violence Project was started in North-Western Kenya in a bid to reduce the incidences of violence within the region.

In 2016, a Road Safety Health and prevention project was also introduced to advocate for legislation ensuring the safety of children on Kenyan roads.

As of 2021 and 2022 HI implements projects in Inclusive employment, gender equality, inclusive rehabilitation and a professional Fellows program in the Nairobi County. HI is also working with individuals in Kakuma and Dadaab refugee camps supporting inclusive education, livelihood and protection programming.

In 2023 HI became an Implementing Partner of UNHCR in both Dadaab and Kakuma implementing projects supporting refugees and asylum seekers, persons with specific needs (elderly persons with disabilities), youth empowerment/engagement, community-based complaints mechanisms, community empowerment, mental health and psychosocial support & rehabilitation. This is in addition to rehabilitation and inclusive education.

Overview of ongoing projects

Sectors of services where HI conducts projects and focus on beneficiaries and operational partnerships

Project title and main sector(s) of intervention	Main activities	Beneficiaries	Partner(s)	Location	Project start and end date	Donors who finance the project
